OVERVIEW

I am a conscientious and diligent worker with strong programming skills. Being the oldest of five children, I am responsible and industrious. I am very reliable and have baby sat and tutored my younger siblings and cousins for a number of years.

PROGRAMMING EXPERIENCE

I have been coding for 7 years and can code in Python, JavaScript or any specific languages such as Scratch. A link to my GitHub profile (<https://github.com/Cormac-Flanagan?tab=repositories>).

WORK EXPERIENCE

Food Service

Hidden Gem's Cafe, Tugun

I developed skills in customer service, cleaning, using the cash register and basic food preparation skills. The cafe is a busy cafe serving the early morning to lunch crowd. I assisted with clearing and cleaning tables, cleaning food preparation areas, assembling sandwiches as instructed and wrapping sandwiches for the display cabinet. I also had an introduction to using the cash register.

Baby sitting

As the oldest of five children I babysit my own siblings often including after school and in the evenings. This has extended to babysitting my cousins for my Aunts and Uncles. When babysitting I have kept children entertained, ensured homework was done, cooked dinner and cleaned up.

Tutoring

I have tutored my younger siblings and cousin in Mathematics (Essential Grade 11, Grade 8-10 Mathematics). I have also assisted them in various computer programming tasks both academic (Grade 7 Programming to design a game using a scratch clone) as well as social (Minecraft programming).

SKILLS

Computer Skills - Python, Javascript

Teamwork

Problem-solving
